

# Water & Wastewater

## Introduction

The Cullys Group of Companies ([www.cullys.com.au](http://www.cullys.com.au)) are established specialist infrastructure & process contractors and maintenance services providers. For 18 years Cullys has serviced the Defence, Water & Sewerage, Marine, Petrochemical, Mining, Construction, Energy and Communications industries.

Cullys National presence ensures efficient and effective support is provided. Our National coverage includes Perth, Darwin, Sydney & the Sunshine Coast and through our Alliance Partners we have points of presence in Melbourne & Brisbane.

As a partner of Cullys, Renewed Water Solutions (RWS - [www.rwspl.com](http://www.rwspl.com)) is a water & wastewater industry specialist, providing consulting services for system design, technology procurement, site integration and lifecycle management services.

Cullys RWS specialises in the integration & maintenance of decentralised water & wastewater treatment & recycling infrastructure, which is critical to the successful implementation of Sustainable Integrated Water Cycle Management strategies.

As wastewater treatment, water harvesting, desalination, filtration and combined options have become key elements of water resources planning, Cullys RWS recognises the need to provide the following areas of support to our Clients:

- ◆ **Align technology with site specific requirements.**
- ◆ **Facilitate tailored financial solutions.**
- ◆ **Design, procure & deliver integrated systems.**
- ◆ **Provide lifecycle services & technical support.**

We are committed to the development, deployment, operation & maintenance of environmentally sensitive decentralised solutions that incorporate functional layouts, ensure operational efficiency, include modular compact components and are based on proven technology.

By continually researching evolving technologies and adapting them to new applications, we are well prepared for the challenges associated with meeting the increasingly stringent regulatory criteria.

Cullys RWS maintains strategic alliances with water & wastewater treatment technology OEMs to ensure we offer the complete range of process capabilities and provide cost effective, innovative solutions that are tailored to each Client's specific needs. We deliver the following point-of-source private & municipal process capabilities:

- ◆ Water Harvesting (rain & storm)
- ◆ Leachate Treatment (industrial & landfill)
- ◆ Water Purification (process, saline, brackish & ground)
- ◆ Wastewater Treatment (black, grey, industrial, slipway & bilge)
- ◆ Wastewater Reclamation (sewage, grey, pool, laundry & washdown)

Cullys RWS delivers complete solutions for controlling the effects on the environment by managing wastewater, maximizing the use of reclaimed water and generating alternate water sources.
